

17 December 2015

Dear Parent/Carer,

Year 8 Maths Assessments

A second Year 8 Maths test will be taking place in the week beginning 4th January 2016.

The test will consist of one written non calculator paper and will focus on written methods and problem solving. A revision list linked to the test will be posted to all students on the Show My Homework website. In order to prepare, students should revisit their learning in their exercise book, or use internet sites such as www.mymaths.co.uk (username: Abbey; password: profit) or BBC bitesize.

These results will be used to assess your child's current mathematical skills. After the test, some students may move up or down a set to ensure their learning matches their current ability. This will be based on the result achieved in the test, together with classroom performance.

Students are expected to bring the correct equipment to the exam.

Yours sincerely,

Dr Oswell
Lead Learner for Maths
